

DISCIPLINE SPECIFIC ELECTIVE COURSE (DSE-08): revised RESEARCH METHODOLOGY to be followed from 2025-26 academic year

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
RESEARCH METHODOLOGY DSE-08	4	2	0	2	Semester V	Nil

Learning Objectives:

- To introduce fundamental principles of research, including types, designs, and approaches used in biological sciences.
- To provide hands-on experience in data collection, analysis, interpretation, and scientific communication.
- To develop critical skills for framing research questions, hypotheses, and experimental designs.
- To equip students with tools for conducting literature reviews using digital and print resources.
- To train students in scientific writing, referencing, plagiarism checking, and intellectual property rights.
- To encourage ethical practices and promote problem-solving through scientific investigation aimed at societal benefit.

Learning Outcomes:

After successful completion of the course, students will be able to:

- Describe the key concepts, types, and methodologies of research in biological sciences.
- Formulate research questions and hypotheses, and design appropriate experimental or survey-based studies.
- Conduct comprehensive literature reviews, identify research gaps, and synthesize existing knowledge.
- Collect, analyze, and interpret qualitative and quantitative data using appropriate statistical or software tools.
- Write scientific reports, proposals, reviews, and thesis documents using correct referencing and citation styles.
- Demonstrate ethical research conduct, understand plagiarism, and appreciate the basics of intellectual property rights.

Theory:	30 hours
Unit 1: Basic Concepts of Research	4 hours
Objectives, Research Methods vs Methodology, Types of Research-Quantitative vs Qualitative, Analytical vs Descriptive, Basic vs Applied, Field Research, Search engines, Literature-review and its consolidation	
Unit 2: Research Design, Data Collection and Analysis	12 hours
Conceptualization a research problem, Developing a research model, Validation of the proposed model with standard procedures and attributes, Experimental design, and implementation, Observation and Data acquisition, Methods of data collection, Data quality check, Processing and Analysis Strategies; Data presentation (Tables and Figures), Interpretation	
Unit 3: Ethical Issues	04 hours
Intellectual Property Rights, Copy Right, Plagiarism, Commercialization and Royalty	
Unit 4: Report Writing	10 hours
Technical Research writing (Dissertation/ Reports/Research/Review papers), Citations, Acknowledgements, Research Grants/ Fellowships, Bibliography	
PRACTICALS:	60 hours
1. Search engines, Literature survey, identification of gap areas 2. Presentation of collated literature 3. Experimental layout, execution, observation 4. Data analysis, using softwares, tables and figures 5. Writing a report/research paper/dissertation/summary 6. Preparation of bibliography in different formats as per journal's requirements 7. Usage of software tools for checking plagiarism
